TYTEX®

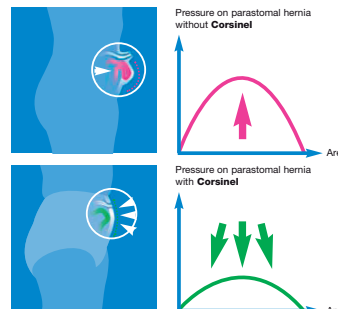

Corsinel Tube is designed to support and retain abdominal hernias. The tube offers maximum support to alleviate the uncomfortable feeling of a dragging hernia, making daily and strenuous activities easier to perform. Use of the tube also enhances a smooth appearance, providing discretion and encouraging participation in social life.

The tube has 4-way-stretch, which provides perfect adaption to body contour. Skin friendly material ensures no allergic reaction, redness or skin irritation in general. Seamless knitting offers optimum wearer comfort. The tube is designed for all day use.

Indication:

The Corsinel Tube is specially designed for parastomal hernia, umbilical hernia, epigastric hernia or abdominal scar hernia. The Corsinel Tube is developed for abdominal support of the above hernia types. The support from the tube offers relief, alleviation, assists mobility and counteracts sense of gravity, thereby providing pain relief. Furthermore, the tube may help reduce possible smells and noises from a stoma. The tube may also reduce the risk of developing a hernia. The Corsinel Tube is available in three heights: 15, 20 and 26 cm. For recommendation on height and use, please contact your doctor or nurse.

Precautions:

Make sure the product is not compromising lung functions. We advise against using the tube during pregnancy, by acute abdomen, abdominal compartment syndrome, presence of ascites fluid or general discomfort/pain in the abdominal region. Please consult your doctor if you suffer from Chronic Obstructive Pulmonary Disease, if you experience unexpected discomfort, stoma or skin irritation, or if you have any questions regarding use. If urgent need for removal of product, open with scissors.

Available colours:

Composition:

66% Polyamide
20% Elastane
14% Cotton

Care Handling:

140°F

Wash with similar colours and in a washing bag. Use of chlorine based bleach or chlorine based disinfection will decrease durability and function.
